Dear Manoj,

I am hereby attaching the screenshots and codes for the todo application that was asked from me.

Kindly forward the artifacts to the concerned person as I do not have his mail id or contact.

```
Database changed
MySQL [todo]> select 'id', 'name', 'desc', 'status', 'due_date' from task;
+----+-----+-----+-----+-----+
| id | name  | desc                                     | status | due_date |
+----+-----+-----+-----+-----+
| 1  | test task | test desc                             | InProgress | 2018-07-10 |
| 3  | task2    | a testing task with a dummy description | Completed | 2018-07-10 |
| 4  | task3    | a testing task with a dummy description | Todo    | 2018-07-10 |
| 5  | task4    | a testing task with a dummy description | Todo    | 2018-07-10 |
+----+-----+-----+-----+-----+
4 rows in set (0.01 sec)

MySQL [todo]>
MySQL [todo]>
MySQL [todo]> Bye
[ec2-user@ip-172-31-202 ~]$
[ec2-user@ip-172-31-202 ~]$
```
